SUMMARY

A dedicated full-stack software development engineer seeking an opportunity to contribute technical expertise and problem-solving skills to a forward-thinking company, with the goal of delivering high-quality, user-focused solutions

WORK EXPERIENCE

Solutions Resource   **July 2024 - Present**
- Contribute as a full-stack software development engineer by delivering robust backend systems with AI/ML and intuitive frontend interfaces to ensure high-quality solutions for clients.

Rewards Point System   **Nov 2024 - Present**
- Designed and developed a robust payment gateway module and voucher redemption system as part of a scalable microservices architecture, ensuring secure transaction handling, seamless integration with third-party services, and efficient reward disbursement workflows.

Yamaha Dealer Network Distribution (DND)   **Nov 2024 - January 2025**
- Partake as a Backend Java Developer to the Yamaha DND ticketing system by developing reliable, secure, and efficient backend services that support streamlined issue tracking and resolution.

Airevent (GALA)   **July 2025- Present**
- Contribute as a Frontend React Developer by building a responsive, reliable, and user-friendly application for an event creation system.

EDUCATION

Bachelor of Science in Information Technology   **March 2020 - June 2024**
Our Lady of Fatima University Quezon City
- Capstone on "Project ASARM - Adequate Smart Augmented Reality Mirror".

Fullstack Developer Bootcamp   **July 2024- January 2025**
Solutions Resource
- Completed an intensive bootcamp focused on full-stack software development, covering both frontend and backend technologies.
