SUMMARY

Full-Stack Software Engineer with a primary focus on **Backend Engineering**. Leveraging a strong foundation in frontend development to build intuitive, end-to-end solutions with an emphasis on server-side logic, API architecture, and database management. Dedicated to optimizing the core systems that power seamless user experiences.

WORK EXPERIENCE

- Rocket Partners**

Feb 2026 - Present

 - Junior Java Cloud Engineer specializing in designing and implementing robust RESTful APIs and scalable backend architectures. Proficient in Spring Boot and cloud-native principles, with a focus on building high-availability systems and optimizing server-side logic for modern web applications.
- Solutions Resource**

July 2024 - Feb 2026

 - Contribute as a full-stack software development engineer by delivering robust backend systems with AI/ML and intuitive frontend interfaces to ensure high-quality solutions for clients.
- Rewards Pointing System**

Nov 2024 - Feb 2026

 - Engineered secure and scalable payment gateway, voucher redemption, and communication services as part of a microservices ecosystem, delivering seamless third-party integration and optimized reward disbursement workflows in Java Spring Boot.
- Airevent (GALA)**

July 2025 - Feb 2026

 - Worked as a Full-Stack Developer on an event creation system, building the React-based UI while also developing backend services, API integrations, and application logic to ensure performance and reliability.
- Raya Trading System (Freelancing)**

Nov 2025 - Jan 2026

 - Hired to enhance and maintain an existing inventory management system, improving functionality and performance using native PHP.
- Redyoos (AI Jewelry Appraisal)**

Oct 2025 - Dec 2025

 - Implemented an AI/ML-powered jewelry appraisal solution that automatically produces initial valuation estimates, reducing manual assessment time and improving consistency across appraisals.
- Yamaha Dealer Network Distribution (DND)**

Nov 2024 - Jan 2025

 - Partake as a Backend Java Developer to the Yamaha DND ticketing system by developing reliable, secure, and efficient backend services that support streamlined issue tracking and resolution.
- EC Solutions & Enterprise**

Feb 2024 - May 2024

 - Contributed to the design and implementation of a parole and probation system utilizing PHP and jQuery.

EDUCATION

Bachelor of Science in Information Technology

March 2020 - June 2024

Our Lady of Fatima University Quezon City

- Capstone on "Project ASARM - Adequate Smart Augmented Reality Mirror".
- Technical Officer of Our Lady of Fatima University Organization
- Directorate of College of Computer Studies(CSS) for Fatima Computing and Multimedia Society(FCMS)
- Pre-capstone of "KCrochet: Apparel E-commerce Website".

Fullstack Development Bootcamp

July 2024- January 2025

Solutions Resource

- Completed an intensive bootcamp focused on full-stack software development, covering both frontend and backend technologies.

CERTIFICATIONS

- Official Appointee for Government-Academic-Industry Linkage Pathways (GAILP)
- Technical Judge | ByteForce: Inter-Campus Hackathon
- Dedication and Reliability Award
- Bootcamp Certificate of Completion
- AWS: Generative-AI Solution-Focused Immersion Day
- AWS: Innovate and Migrate
- AWS Skills Centers: Becoming a Cloud Practitioner - Core Services 1
- AWS Skills Centers: Becoming a Cloud Practitioner - Core Services 2
- Cisco Networking and Cyber Security

ADDITIONAL INFORMATION

Technical Skills

- **Programming Languages:** Java, Python, PHP, JavaScript, TypeScript, Swift, C#
- **Backend & Frameworks:** Spring Boot (MVC), Node.js, Next.js, Microservices
- **Frontend & Mobile:** React.js, Next.js, React Native, Vite, Android Studio, Xcode
- **Databases:** MySQL, PostgreSQL, NoSQL, Database Schema Design (ERD)
- **DevOps & Cloud:** AWS, Docker, CI/CD, Maven, Git w/ Workflow
- **Game Development:** Unity C#
